CareMail® Mailing and Shipping Supplies

Are you interested in mailing products that show you care for the earth like you care for your items? In stores now, you'll find a full line of CareMail® mailing and shipping supplies. From tape & boxes to envelopes, wrap & box fill, this program is "packed" full of exciting new products!!!

While each item has its own unique sustainability story, the main focus for this product line is the use of high post-consumer recycled paper. Why? Because recycled paper production consumes 65% less energy, uses 80% less water and creates 90% less air pollution than virgin paper production.* In addition, the high post-consumer recycled content helps drive refuse out of waste streams and into new products!!

And that's not all...all of our items are recyclable and/or biodegradable and most can even be reused!! These are all measures to help keep unnecessary waste out of our limited landfill space.

Packed with useful information, "CareMail®", brochure is intended to educate consumers about packing solutions, and give an overview of the "CareMail®" product line.

.The "CareMail®" brochure is available for downloading.
